

AB Sustainable Cautious Data as at 31 October 2024

Investment Objectives

Our objective is to outperform UK CPI over the medium to long term, keeping within the prescribed volatility limits whilst investing in low-cost ETFs or Index funds, physically invested and with a low tracking error. To achieve the investment objective, we deploy quantitative and qualitative techniques and extensive research that shape our macroeconomic views. The AB Sustainable Cautious invests a minimum core of 80% in funds that are sustainable and contribute positively to either the environment or society, and that provide solutions to global issues. The sustainable models are aligned to the core model's risk first asset allocation, utilising passive instruments, whilst remaining a cost effective solution to responsible investing.

Manager Commentary

October was turbulent for risk assets, with early gains eroded by month's end as liquidity waned. Valuations in some sectors appear stretched, raising questions about the potential for a year-end rally.

In the UK, Chancellor Reeves abandoned fiscal rules, adding £50+ billion in debt. Despite parallels to Mrs. Truss's policies, market reactions were muted. Gilt yields rose to 4.4% with more issuance expected, while UK equities remain selectively appealing.

The US economy remains strong, with 3.4% GDP growth and low credit spreads indicating corporate health. Inflation hovers at 2.4%, though adjusted figures fall below 2%. Improved October employment data reduced bond market's expectations for further Federal Reserve rate cuts, pushing Treasury yields higher and challenging equity valuations. Despite this, a November rate cut remains likely as the Fed navigates easing employment pressures.

As the US election nears, markets react to shifting poll dynamics. Ample liquidity supports risk assets, and a stronger dollar reflects geopolitical concerns. Overall, optimism persists for a solid year-end finish.

China's \$28bn stimulus, though significant, falls short of market expectations, leaving recovery prospects uncertain. Investors demand more decisive action from the People's Bank of China. Japan's weaker yen and rising inflation have become problematic, increasing the likelihood of Bank of Japan intervention. Additionally, China's low-cost exports are pressuring Japan's vehicle exports, signalling that equity values may have peaked.

In Europe, inflation has dropped to just above 1%, but economic struggles in Germany and France persist, with manufacturing in decline. Volkswagen's factory closures highlight the challenges. Another round of quantitative easing could be on the horizon as the Eurozone navigates its fragile recovery.

The Technology sector and emerging market funds delivered positive returns, while sustainable energy and long-duration bond funds lagged, weighed down by their sensitivity to rising yields.

At a portfolio level, the Sustainable Cautious model benefited from its emerging markets equity exposure. Of the portfolio's top holdings, the best performing fund was the Vanguard ESG Emerging Markets All Cap Equity Index Fund. One of the fund's holdings is HCL Technologies, a provider of software services and IT infrastructure services, with expertise in digital engineering and cloud. They deliver solutions across the globe and operate the HCL Foundation in India that aims to create more equitable and sustainable communities where the company operates. The Foundation is designed for socioeconomic and environmental development and its 450 strong team is breaking the cycle of poverty and regenerating local environments.
